

CORIAN® QUARTZ

The INDIA
color portfolio

This Corian® Quartz paper palette is a flexible, handy and lightweight tool composed of high-definition printed paper samples which give a visual impression of what Corian® Quartz colors look like.

All printed colors were evaluated and compared to real Corian® Quartz samples under a 6000k lighting source.

This Glacier Ridgeway allowed the most accurate print match with the original material. The printed colors which present an accentuated metamerism, are mainly due to the mineral pigments contained in the inks.

Evaluation under different lighting conditions as well as differences in visual perception, could lead, for some colors, to appreciable differences between paper and material.

It is always advisable to evaluate the physical Corian® Quartz sample before making the final selection.

We invite you to visit www.corianquartz.com, www.corianquartz.in, check our online color tool or ask your Corian® Quartz sales contact for more information.

Aesthetic Highlights

Corian® Quartz aesthetics includes a variety of characteristics that deserve attention to achieve the best possible result for your project. The following list provides a description of aesthetic characteristics found on each of the following printed color pages for your reference. It is advisable to evaluate physical samples before making your final selection. For more information, visit Corianquartz.com or consult with your Corian® sales contact.

- * **Samples may not represent full aesthetic:** samples may not represent full aesthetic. Variations in gloss, color, shape, background tone and pattern are inherent and unique characteristics and do not affect product performance. Visit corianquartz.com or ask your Corian® Quartz sales contact.
- * **None needed:** for more information, visit corianquartz.com or ask your Corian® Quartz sales contact.
- * **Contains random veins:** samples may not represent full aesthetic. Variations in gloss, color, shape, background tone and pattern are inherent and unique characteristics and do not affect product performance. Random veining can make seams more visible. Visit corianquartz.com or ask your Corian® Quartz sales contact.
- * **Contains large, pronounced veining and leathered surface:** this color has large, pronounced veining and sample may not represent the full aesthetic. Random veining can make seams more visible. Variations in gloss, color, size, shape, background tone and pattern are inherent and unique characteristics and do not affect the product performance. The leathered surface of this color is more prone to showing signs of daily use and will require more frequent cleaning. Visit corianquartz.com or ask your Corian® Quartz sales contact.
- * **Contains large, pronounced veining:** This color has large, pronounced veining and sample may not represent the full aesthetic. Random veining can make seams more visible. Variations in gloss, color, size, shape, background tone and pattern are inherent and unique characteristics and do not affect product performance. Visit corianquartz.com or ask your Corian® Quartz sales contact.
